

IRB Human Subject Research Process for Students

This document outlines the procedures for all human subject research conducted by Fresno Pacific University students. The following process must be completed before research is conducted.

1. The student's faculty mentor must submit the completed IRB Proposal Form with the following documents (if applicable):
 - a. Consent form(s), assent form(s), and/or information sheet(s);
 - b. Instruments or questionnaires that will be used as part of the research;
 - c. Documented approval from the organization or institution where the research will be conducted.
2. Please submit all IRB application materials to IRB@fresno.edu. Failure to include all required application materials including the IRB Proposal Form may result in an application processing delay. Applications are processed in the order received.
3. Data collection may begin upon email notification of IRB approval. A copy of the approval letter will be emailed to the faculty mentor and student researcher.
4. If anything changes in the research study or any problems arise, the IRB must be notified by the student/faculty mentor within three (3) working days.
5. The student/faculty mentor must notify the IRB within three (3) working days of any new information that may impact the risk-benefit ratio and then wait for approval by the IRB before continuing with the study.
6. The student/faculty mentor must notify the IRB for approval of research that takes more than one year to complete, the mentor must submit a Research Project Continuation Form.
8. The IRB Proposal Form and Research Project Continuation Form are available on the IRB website.
9. Specific questions about the IRB application process should be addressed to the IRB Chair.
